

Rail Sustainability Summit

Mark Gaynor

Rail Delivery Group

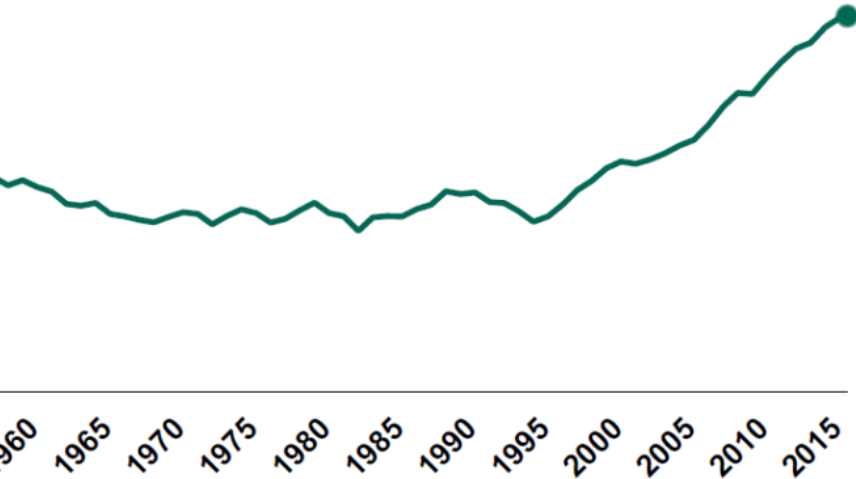

Railway is an ever more vital part of a sustainable transport system

- Connecting Britain: joining up communities and providing access to jobs, goods and services
- Delivering the backbone for economic growth
- Reducing road congestion
- Reducing carbon emissions

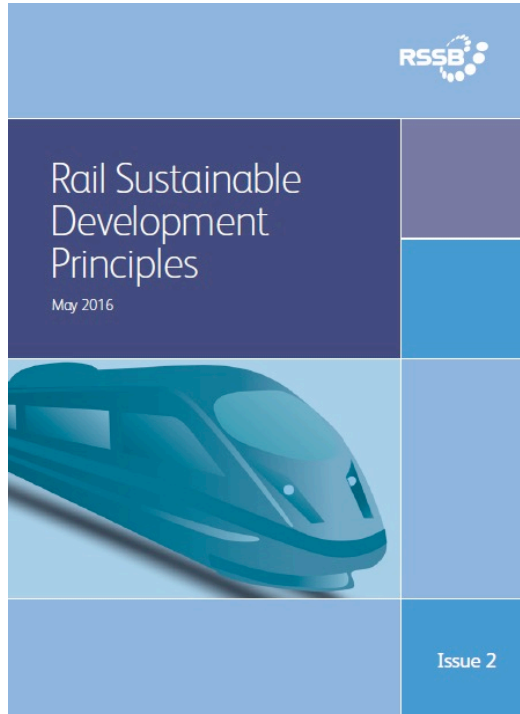

Britain's railway working together

Rail passenger kilometres in Great Britain

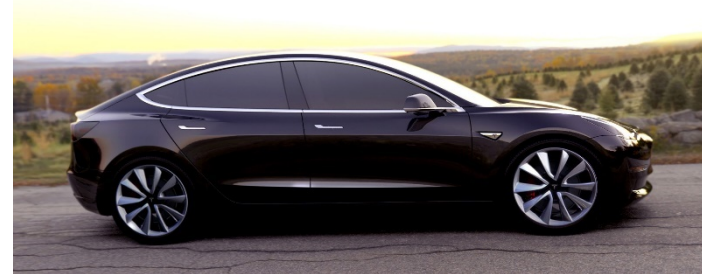

- Passenger numbers have doubled in last 20 years
- Record levels of government investment
- One of the safest railways in Europe
- Passenger satisfaction highest for 4 years
- Majority of passenger journeys on electric trains

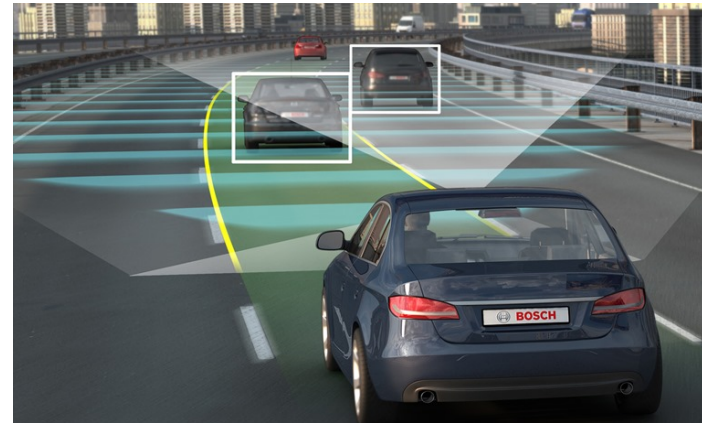

ve the right building blocks in place...

but more needs to be done

VS

So what needs to happen?

Clear and ambitious vision of where we want to get to as an industry

Strong and consistent industry and government leadership

Decisions made for the long term sustainability of the railway

Sustainability a cross-cutting theme through all of our plans, projects and programmes

Sustainability a core part of industry training, development and induction
